OBJECTIVE

Final-year Bachelor of Engineering student in Computer Science and Engineering (Internet of Things, Cybersecurity including Blockchain) with a CGPA of 8.06. Skilled in Python, C, HTML, CSS, JavaScript, Git, and GitHub, with hands-on experience in developing web applications and IoT-based projects. Strong understanding of Software Development Life Cycle (SDLC), problem-solving techniques, and software engineering principles gained through academic coursework and certifications. Quick learner with excellent communication and teamwork skills, eager to contribute as a Custom Software Engineer by designing, developing, configuring, and supporting cloud-based software applications.

EDUCATION

Bachelor of Engineering in Computer Science (ICB) Alvas Institute of Engineering and Technology, Moodbidri CGPA: 8.06	2023-Present
DEPARTMENT OF PRE-UNIVERSITY J.S.S R.S. Hukkerikar PU Collage , Dharwad Percentage: 63%	2022-2023
SSLC J.S.S ENGLISH MEDIUM HIGH SCHOOL , Dharwad Percentage: 73.76%	2021

TECHNICAL SKILLS

- Programming Languages:** C, Python
- Web Technologies:** HTML, CSS, JavaScript
- Tools & Platforms:** Git, GitHub, Visual Studio Code, Maven (Basic)
- Professional Skills:** Communication, Problem-Solving, Team Collaboration, Adaptability, Analytical Thinking
- Core Computer Science:** Internet of Things (IoT), Blockchain Fundamentals

PROJECTS

- Personal Portfolio Website | HTML, CSS, GitHub Pages (2025)**
 - Designed and developed a responsive personal portfolio website using HTML and CSS.
 - Implemented a user-friendly interface to showcase academic projects, technical skills, and certifications.
 - Deployed the website using GitHub Pages for public access.
 - Utilized Git and GitHub for version control and project management.
- Weather Application with Rating System | HTML, CSS, JavaScript (2025)**
 - Developed a responsive weather application using HTML, CSS, and JavaScript.
 - Integrated the OpenWeather API to display real-time weather information based on user input.
 - Designed a multi-tab interface for improved navigation and user experience.
 - Implemented a user feedback and rating feature to collect application reviews.
 - Strengthened skills in API integration, responsive web design, and front-end development.
- IoT-Based Temperature Monitoring System | Python (2025)**
 - Developed a Python-based simulation for monitoring temperature data using IoT concepts.
 - Implemented data collection and logging functionality to simulate sensor readings.
 - Applied IoT principles learned through certification to design a conceptual monitoring solution.
 - Improved understanding of data processing and modular application development.

CERTIFICATIONS

Introduction to Software Engineering Professional Certificate — Coursera	Sep - 2025
Python Foundation Certification - Infosys Springboard	Jan-Apr - 2025
Introduction to Internet of Things—NPTEL	Jul-Oct - 2025
The Joy of Computing using Python - NPTEL	Nov - 2025
